## Photo Restoration

We offer a flat rate restoration fee of \$40 per photo.

Scratches, tears, water marks, and stains can be removed. Black and white photos can be transformed into color ones. While our restoration technicians are skilled there are limits to what can be accomplished. Please bring in your photos so that we can take a look and discuss your options and possibilities. While most jobs fall under the \$40 rate we reserve the right to adjust a quote once we have seen the print.
